

# WALLS

MICROTOPPING

May also be placed vertically on interior walls, creating the look of Cloudy plaster.

Its advantage is that it can be used both in new construction and wall & floor renovation, also perfect for covering any part of the floors and walls without having to remove the existing material.

Microtopping wall is a single component thin concrete overlay

## Walls

Perfect for covering any type of vertical surface.

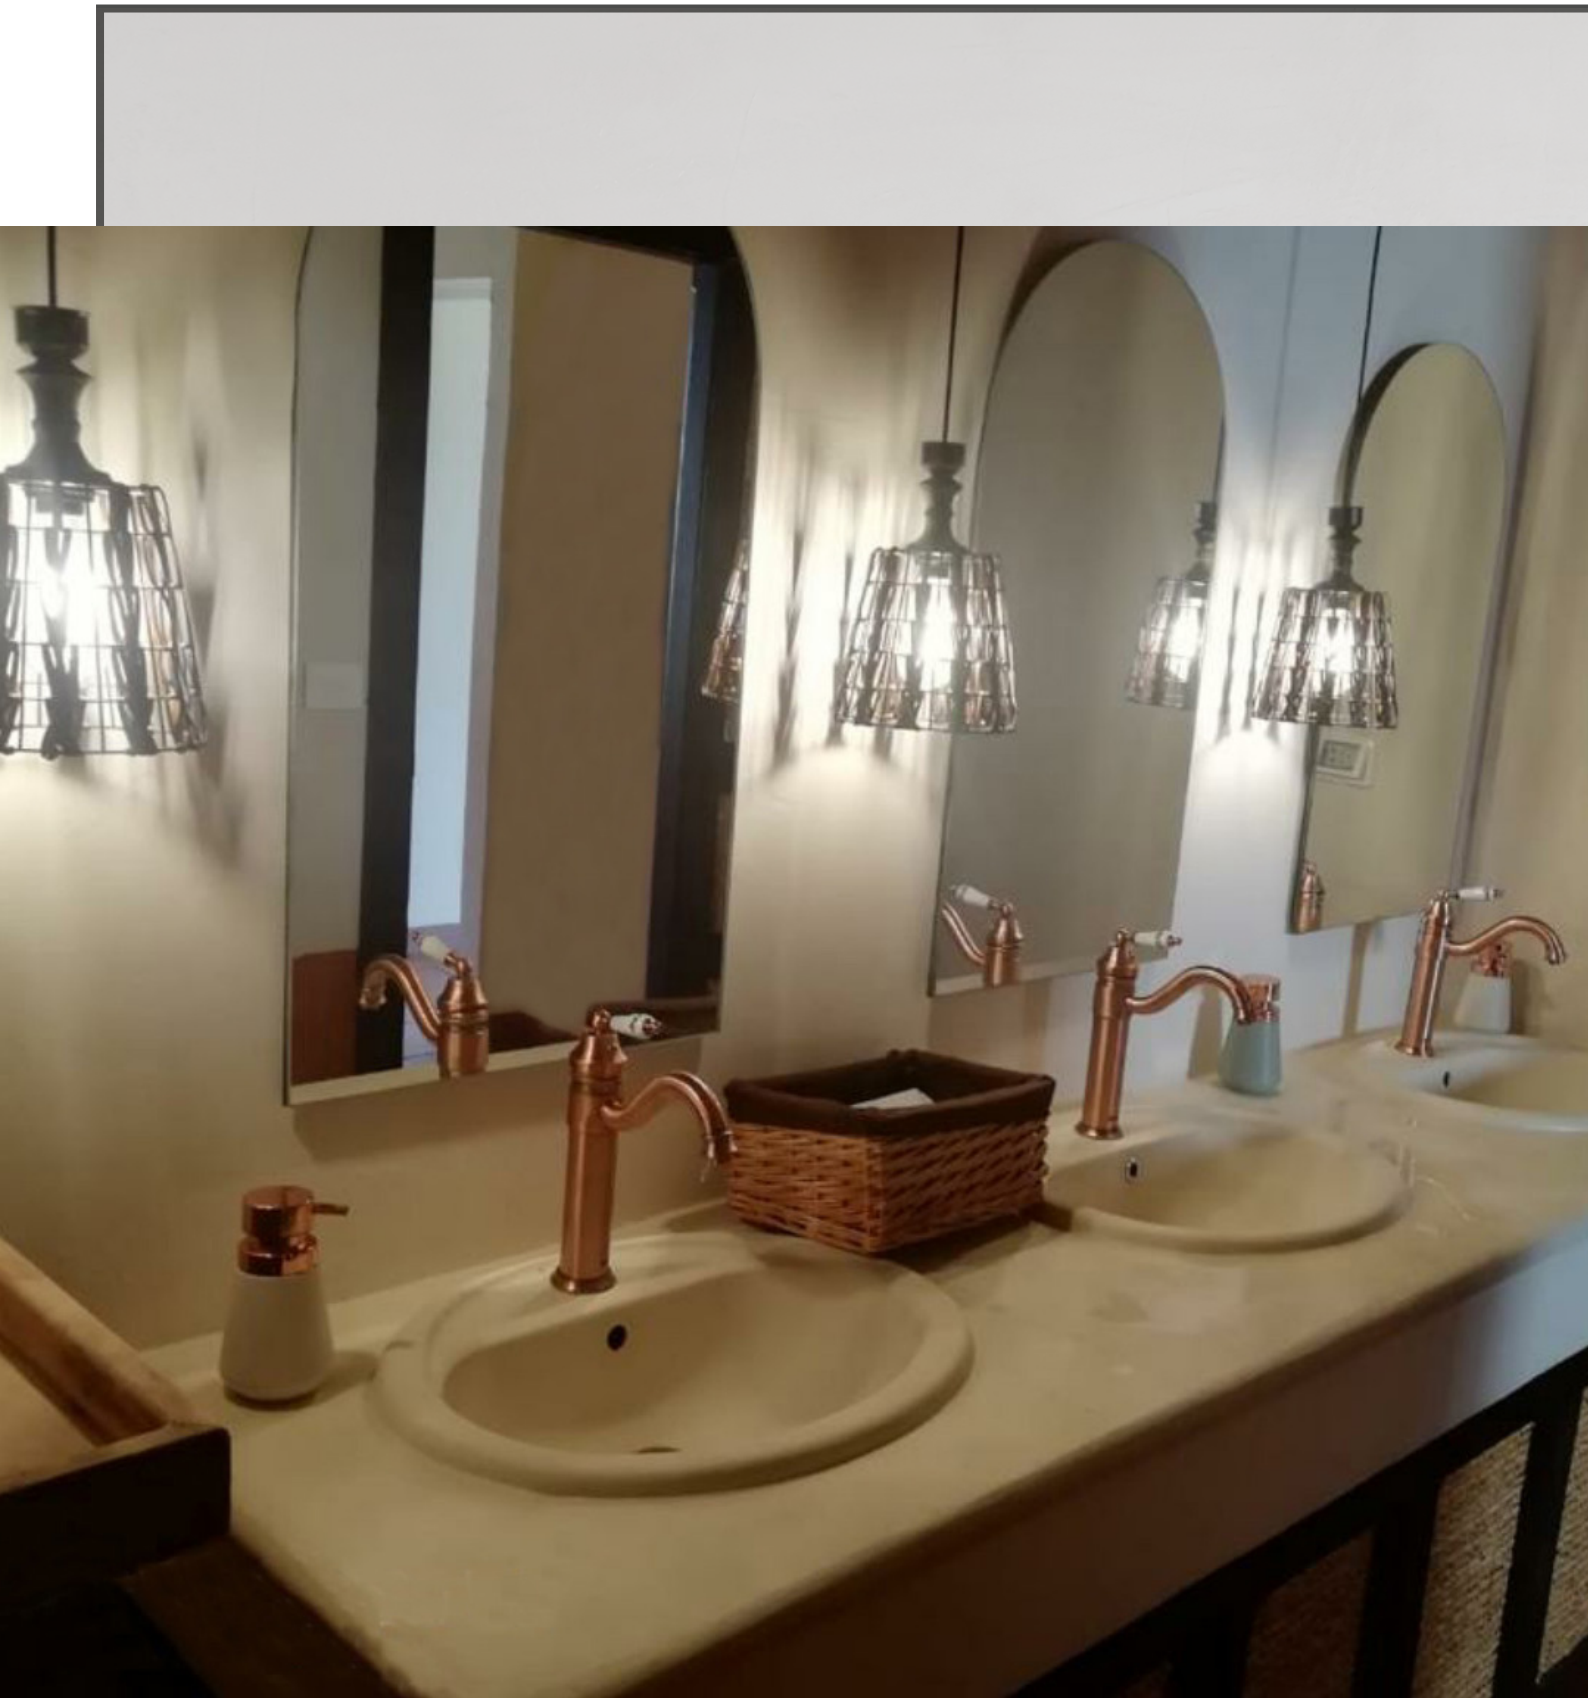

Microtopping concrete walls give a very unique, antique and rich look along with good durability which is economical as well.

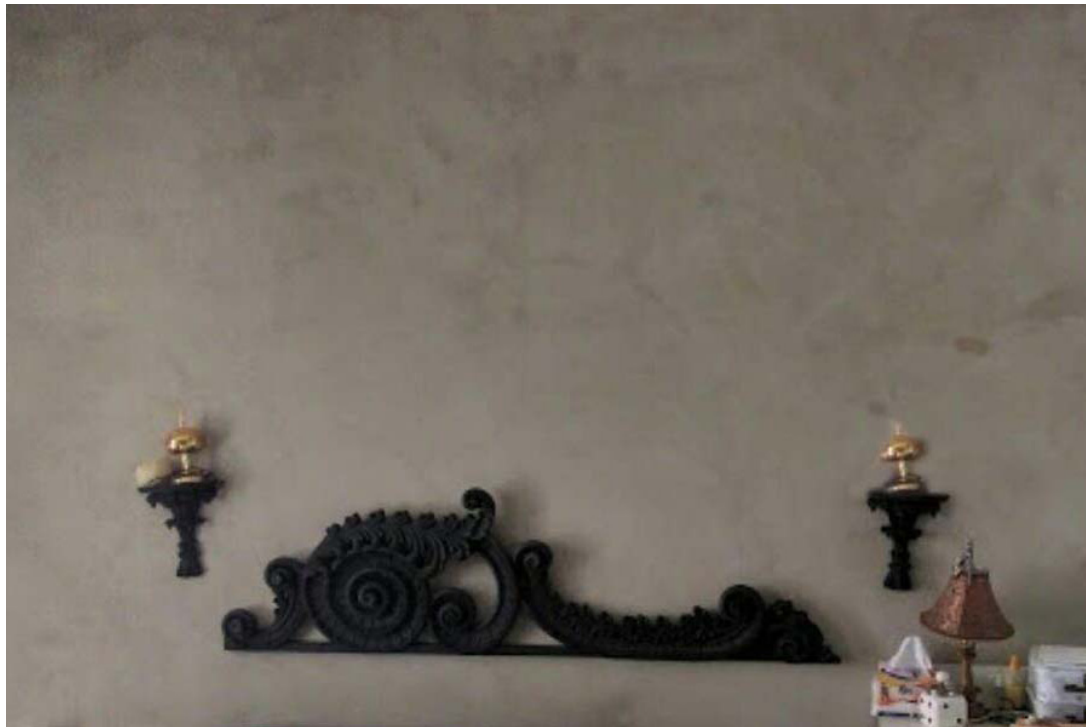

Countertops coating styles.  
Relaxing atmospheres

We provide microtopping on the walls with various colours, shines and textures
